About Us

We are a group of Retro Arcade enthusiast and lover of all gaming. We decided to use Blockchain Technology along with our love of programming and gaming to develop some Retro Arcade style games, as well as RPG and Multiplayer games for our Token holders and others to enjoy, play and earn some BNBs while holding our coins.

Our initial game releases starting the 2nd Quarter of 2022 will be familiar to most because they will be games like Space Invaders, Galaxian, Pac-man and others. Those game will be connected to the Binance Blockchain through smart contracts and reward players with ARCADE tokens, and BNB.

These games will allow you to connect your wallet and play. If you are a holder of at least \$50 worth of ARCADE tokens, you will be rewarded every week with more ARCADE tokens, so the value of your investment will increase overtime as you play. If you are a holder of at least \$200 worth of ARCADE tokens, at the end of every month, the top 5 players with the highest points will split \$500 worth of BNB.

Every time you login with your wallet and play the games, your points will accumulate. So even if you finish all the levels or screens in a game, you can start over and accumulate points for end of the month top prize of \$500 worth of BNB. Scores will be reset at the end of every month.

The Future

As we grow, we will hire new developers. In the 2nd Quarter of 2023, we hope to release some modern games. Our goal will be to develop a Multiplayer Arcade Verse where our Token holders can compete against each other, play a variety of games on the Blockchain and win NFTs, BNBs and other prizes.

The Arcade Verse will allow all ARCADE token holders to use their NFTs, as costumes, weapons, etc for their avatar. You will be able to use our GameSwap to swap your ARCADE tokens, NFTs and prizes for BNBs. You will also be able to swap BNBs for ARCADE tokens.

Eventually we will sponsor game tournaments for our token holders where the prizes can be as much as \$2500. The plans for the future is bright and we can't wait for you to be a part of it.

We do reserve the right to make changes to this document as the need arise.
